Introductory and Membership Letter

The Wisconsin Fleet Maintenance Council was established in November 1977. Through the years, the WFMC has evolved into the areas number one source for the improvement of professional knowledge through the concise exchange of ideas and practices in the transportation and equipment maintenance shops of northeast Wisconsin. Since our founding, the Green Bay chapter has been the leading entity as Milwaukee and Plover has teamed up to bring the same information to their respected areas. All three councils meet bi-annually and plan coordinated programs to furnish the best technical representatives possible. In contrast to some maintenance councils and organizations with an emphasis on socializing, we are committed to the exchange of ideas, practices and concise informative programs. The WFMC Green Bay chapter is open to managers, technicians and students from fleets, municipalities, schools and vendors. The fee is \$45/year per membership. Monthly meetings held September thru May. To join please complete the application form and remit along with a check payable to:
